DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 and 11-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Stull et al.

Stull et al show a device for dispensing a flowable material comprising a base 20, first member 36, second member 13 and cap 16.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Stull et al in view of Smith et al.

Stull et al lack the cap having a plug. Smith et al show a cap having a plug 140 to effect a good sealing engagement (paragraph 56). It would have been obvious to one of ordinary skill in the art to substituted the device with a cap having a plug as taught by Smith et al to effect a good sealing engagement.

Conclusion

Art Unit: 3754

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Leoncavallo et al, Brown et al and Berge et al are cited to show further examples of devices having a base and cap.
